# Q2. What was good about the TA?

- 1. Personally I think the experience of teaching from this TA may be better due to the clearer and easier examples of explanation with complex concept
- 2. Peter teaches very well in tutorial sessions and is able to explain lots of difficult and confusing concepts in simple words or metaphors. He also explain the rationale behind various programming assignments very detailed so that I found it meaningful and enjoyable. He is one of the best TA I have seen in UST.
- 3. Teaching is excellent
- 4. Very detailed explanation, consider for students
- 5. Very helpfull

### Q3. How might the TA improve?

- 1. No suggestion
- 2. Nothing
- ^ Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):
- $1. \ \ Adjusted \ statistics \ are \ calculated \ to \ provide \ a \ reference \ with \ extreme \ responses \ being \ excluded.$
- 2. If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.
- 3. Adjusted statistics will be provided up to course level if and only if they meet the following conditions:

Level of adjusted statistics	Conditions
Survey level	The survey receives 3 or more responses.

Section level	(1) All surveys receive 3 or more responses; AND	
	(2) This section is taught by One instructor, teaching support staff, or teaching assistant.	
Course level	(1) All surveys receive 3 or more responses; AND	
	(2) This course is taught by One instructor, teaching support staff, or teaching assistant.	

If no adjusted statistics is provided, it will be marked as "-" in this report.
